

Sprint Meeting Results for Sprint 5

What is your Sprint Goal?

Our Sprint Goal is to get our product ready for final demo! We plan to finalize our UI, add additional input options, and add a few final functionality pieces. By the end of this sprint, the user will be able to use MapMe to get a customized itinerary and route map for a given city, and they'll also be able to add in their own custom waypoints (modifying the suggested route).

Who is the Scrum Master for this Sprint?

Annabelle Martin

What tasks will you complete during this Sprint?

Task	Owner	Estimated Time to Complete
Build UI with embedded graphics for input options (mode of transport, place type, start/end times)	Rithani, Anna	150
Revise addCustomPoint algorithm & test	Siddhant, Anjali	200
Color code & add icons for place types (should correspond with tabular display)	Anna	50
Fix radius issue (when large radii are inputted, the search results are still confined to the central city)	Anusha	100
Revise timing algorithms so that each place has a dedicated start and end time & travel time is accounted for	Siddhant, Anjali	100
Autocomplete – fix the bug associated with the Live Location feature	Anna	150
Add letter labels to the table display to align with the route mapping visual	Anjali	30
